The contest is just about to close, we are daily informed by the Lincoln organs Every victory of our armies is about the last that will be needed. The organs proclaim daylight approaching. We have had these predictions often before; but as the election is coming on they are the more necessary, and are, therefore, oftener repeated. The country must be persuaded that the bloody work is nearly done by the efforts of Lincoln & Co., and that he only wants a few more a subjugated people. They have no represent now that Georgia can do is to undo the wrong weeks to finish it. These prophets don't believe a word of their foretellings. They can't boast of any great capacity, but they know better than to believe that the war is near a close with Lincoln's programme. They may succeed in deluding some people, but these prophets are not themselves deluded. After Richmond, Savannah, Mobile and Charleston are all taken, there will be other Richmonds, Savannahe, Mobiles and Charlestons to take. We have had experience enough in the last three years to understand the enemy. He has een exhausted, starved out, cut in two; his forces killed, wounded and missing; and still he lives and fights like a hyena. Driven back at one point, he makes an irruption in another Upon the whole, badly worsted, he endures

and fights. No one can see the future of such a contest but when we lock at the boundless area over which this rebellion has spread, we see that whilst one-tenth is overrun and held by Federal armies, nine-tenths are living far from the scenes of the contest unmolested in their resistance and defiance of the laws of the United States. When our armies move they leave the rebellion behind them. When they get into the heart of the enemy's country, before and behind, and all around, but a few miles rebellion may collapse suddenly, upon some great victory of the Union army; perhaps there not pretend to assert that it may not be; but who believes it will be so? It is in the last degree improbable. The rebels say, with feend whatever it may cost. One ought to understand when he proclaims his purpose to will be as resolute as he is, that whilst be may resolve to conquer and subjugate at any cost, the enemy will resolve to resist at any cost.

On the present programme of the war there is an irrepressible conflict. The two sides can't live together; one is to be exterminated. and of course there is plenty of time for war That it is near an end is all a delusion, the less excusable, inasmuch as we have had some years of experience. Let Lincoln adhere to his policy, and resolve on no compromise but the accomplishment of his party purpose, and four years hence we shall be told again that the rebellion is nearly over; that it is nearly starved or played ou'; and we shall be called on then to credit these same false prophets. However a man may expect to vote, he need not flatter himself that this conquest and sub jugation are near an accomplishment; and is he does not wish to be deceived, he need not flutter himself so. It is very important to party that with their platform peace is near; that they have done the work successfully; and that we shall not have under their rule four years more of blood. Hence these outgivings, which the authors don't believe No one can tell how many victories may still be needed, or how many defeats may be in store; or that there will be any peace when armies in large masses are dispersed. That is

erned, and force does not insure consent. What use has this dominant party made of victories in order to secure peace and Union?

Every victory brings new exactions; and so it cost us the lives of thousands of men and needlessly put the country on the road to will be to the end. They will never make peace and Union except on terms that will never be accepted. Peace might have been made long ago on the terms indicated in Gen. Sherman's letter to the Mayor of Atlanta, but they are not offered. They are precluded by this same party and its President; and yet they tell us, for the thousandth time, that they will

equired than mere military success. Unless they are taken advantage of by the statesman, they are without value. It is just upon this question the Democratic and Republican parties take issue. They both, from different motives, may appreciate the gallantry of the soldier, but the Democrat can charge that, through the fault of the Administration, the victories are failures. The soldier has done his part, and has done it well, but those at Washington have uttorly falled to do theirs. We have by arms nominally, ELECTION TUESDAY, NOVEMBER 8, 1664 at least, acquired possession of parts of seven or eight great States in the South. To send in the track of our advancing army judges with confiscations to issue, and hapgmen with penalties to execute upon all and sundry, is the very last way to over expect a willing return to the Union, or, in fact, any return to the Federal Union. To deprive a people of all hope except what lies in sullen, desperate resistance is the way to rob us of all hope of the Union. This is precisely the course which has been pursued by the Administration. But it is a matter of interest to us that they should be willing States in our Federal Union. If they will consent to that it is a matter of indifference to us how they regulate their own internal affairs, and they are entitled in return to protection in all their rights as republics under the Federal Constitution.

This view Mr. Lincoln utterly repudiates and proposes to continue the war upon it. His plan has been tried, and notwithstanding the great victories of our arms, it is a fail-

That is plump and decided. We can infer, therefore, that he intends to vote for and ald in the re-election of Mr. Lincoln because he believes it would be "fatal to the country." He invites all of these who have hitherto supported him to come forward and "inderse a policy and renew a power which has cost us the lives of thousands of men, and needles:ly put the country on the road to bankruptcy. All reports indicate the presence of General erling Price, with the main bedy of his ces at or near Fredericktown, in Madison county, while his advance, under Shelby and Marmaduke, is in the neighborhood of Farmington, in St. Francois. Thus it appears that the army of invaders who, about a week ago hat Thursday, crossed the Arkansas river at Dardanelle, have since then traversed the intervening region to near the head of Whitewater river. It is regarded as certain that there has been no division of Price's army, and that its operations are now wholly in the Southeast. That any considerable body of his unty, while his advance, under Shelby and That any considerable body of hi ops have moved or are moving up in the athwest is not believed. Confirmation is gain ed that his command consists almost wholly of cavalry, with a small proportion of infantry. He is also said to have but about ten pieces of artillery, while Shelby and Marmaduke have four. Their total force is still estimated at from twelve to sixteen thousand, of which four or five thousand form the advance.

HOW THE WAR BENEFITS ENGLAND,-This war of Lincoln's, while it is destroying the industry of the United States, is building up that of England. A London correspondent of a New York paper says:

I do not mean that we have lost, or are likely to lose, by the war in America. At the least computation the Americans have given a profit of £25,000 000 a year to India. We have metted £100,000,000 on our 1861 stock. We get millions a year out of the American carrying trade. We have made a pretty penny in supplying the belligerents with munitions of war

Special Session of the Police Court-Prominent Parties Charged with Stealing Negroes-The Testimony in the Case.

On Wednesday evening at 3 o'clock, a special session of the Police Court was held for the United States army at Jeffersonville.

Owing to the absence of Judge Johnston, Mayor Kaye presided, R. J. Elliott, Assistant City Attorney, appearing for the State, and Jas. Speed for the defense. The following is the Hydes, City Marshal: Commonwealth vs Henry Devin and A. R.

Barker; stealing Jasper, a slave of Washington Lawrence:

Benjamin B. Gray sworn—I live in Henry county and know Jasper, and he belongs to Mr. Lawrence, of Henry county. I am a deputy under Provost Marshal Womack. He gave me direction to go to Jeffersonville and get the boy. I found him in a room, and Mr. Barker was trying to enlist the boy as a substitute for some one. On my way, before I got to the river on this side, I met Mr. Devin. I know not how the boy got over the river. I ton Lawrence

Louisvilla, Ky., Sept. 22, 1864. Messra. Wm. Caucein & Co.:

Gentlemen—I desire to testify to the virtues of your medicine. I am an Engineer by profession. I have had Chronic Diarrhad of the severest kind for four years; for nearly three years I have been unable to do any work, and the greater part of that time I was so weak from the effects of the sickness that I was unable to waik twenty-five yards without assistance. I was treated by good physicians in this and other cities bordering on the Ohio river, but without success. I was pronounced past recovery, and my case given up as hopeless. I was fleally induced to try your 'Panavera,' and am now, thank God, a well man. My cure I attribute entirely to the use of your medicine. the use of your medicine.

Scouts reported at Decutur Tuesday, that Wheeler left Davville, Alabams, on the 26th inat. for Summerville, sixty-five miles south of Pulaski. Wheeler's men said that he was going to make a junction with Forrest, crossing the Tennessee river near a little place called Gantsville, where boats were being constructed for that purpose. Clanton is expected to unite his command with that of Wheeler. He has been operating for some time back of Gantsville with about 700 men. Another rumor brought into Decatur by the garrison at Decatur. ved to be in the vicinity of Sparts, and that garrison at Decatur.

PENNSYLVANIA .- We hear the best of news from this great State. There is an immense feeling for McClellan. Among other changes are those of D. C. Gillespie, of the Republican State Central Committee, who has come out for the General; and also Colonel William H. Irwie, Chairman of the Republican Committee in Miffla county. The latter has for the hast two years commanded the Forty-ninth Pennsylvania in the Army of the Potomac. But we have still higher authority. A Washlugton letter-writer says:

The other day, as one of the four-horse express wagons which used to carry the boxes of greenbacks manufactured in the State Department was leaving the door of that edifice, John W. Forney, who was talking with a couple of friends, exclaimed, in pointing out the car with his finger: "They may print as many greenbacks as they please but they may many greenbacks as they please, but they will not carry the State of Pennsylvania. That State will go for one man, and that man is not Mr. Lincoln." However incredible the story the following items:

FURNISHING GOODS,

with them her beauty and her youth-fier husband's fortune and his life, during the There were tubes made of paper which had been tested in the most satisfactory manner as rocket tubes. Being made of paper they are, of couse, very much lighter han the ordinary iron tubes, and they stand the test of rocket firing equally as well as those of metal. Not less remarkable were the thick slabs and boards made of paper, These boards, of one inch in thickness, had been tested by bullet and ball, and the result showed that their power of resistance was equal to ten inches of solid oak. The bullet, which had passed so far through the paper board as to cause a projecting surface at the rear, would have gone clean through the oak, fracturing and tearing it in all directions, while in the paper board the perforation made was a small, clean, round hole. These paper boards are admi-rably adapted for the sides of ships; their specific gravity is somewhat less than that of oak, and they are easily fixed to the framework of vessels. They have, however, this additional advantage over timber: they do not require copper sheathing to prevent fouling, they are non-absorbent, and neither animal nor vegetable life flourises upon their surface, as is the case with timber and iron. They have also this further advantage, that they are incombustible. No amount of heat will set them in a blaze. The application of great heat will produce combustion in the immediate neighborhood of the flame, but anything like ordinary burning is quite out of the question. In addition, however, to all these good qualities, paper has positively the advantage over timber and iron in the matter of cost.

M. Szerlemy, the inventor, well-known for the successful manner in which he has arrested the decay of certain portions of the exterior of the Houses of Parliament, has discovered a fiber wich grows in the southern portions of Germany, and which you die. may be converted into a rough kind of paper at a cost so trifling as to enable him to compete with the builder of timber and corners, and about "groceries," cut your ron ships. Not content, however, with hand off rather than place it in his. He is forming the sides of ships of paper, the inventor is now engaged in the construction of light field pieces, specially adapted for mountain warfare, and these, judging from results already obtained by experiments with paper tubes, will be found to answer the purpose admirably. Tubes have already the purpose admirably. Tubes have already been formed of this prepared paper, and the test against iron in the large stood that the large stood the test against iron in the large stood that the large s they have stood the test against iron in the

most satisfactory manner.
So far as we were enabled to ascertain of a "highly respectable family," who seems to be at home as to the usages, custhe process of manufacture, it consists of lapping sheets or rolls of paper moistened with a solution of which zopissa is the principal ingredient, one over the other, until the requisite degree of thickness or strength is attained, and exposing the ma-terial for a short time until it becomes thoroughly hardened. This zopissa is of the nature of a gum, and is found in considerable quantities in Egypt. It has the peculiarity of giving extraordinary hardness to any surface upon which it is placed, and it was very extensively used in the preparation employed for preserving the stone in the exterior of the House of Commons. It has also been used for the exterior of the Bank of England, the interior of the dome of St. Paul's, on which Mr. Penrose has painted his frescoes, and it has just been applied with extraordinary success to the arches of the London, Chatham and Dover railway at the Elephant and Castle station, damp and the infiltration of water from the

There appears to be no limit to the ap plication of this useful material. In addition to the preservation of paper, linen, stone, brick, plaster, and other material, another most useful application of the advantage was shown in the perfection of a naterial resembling flock paper, and suitable for carpets, which can be prepared of any color and with endless variety of pattern. A slight alteration in the mode of treatment converts canvas into a description of oilcloth, which will stand any amoun of wear, as may be seen from some pieces which have been for several months laid down in the workshops at Battersea. The materials of a house are now in courre of follows: construction, for the purpose of showing the adaptability of the paper boards to the construction of emigrants' houses, tempo-rary churches and barracks. Already rary churches and barracks. Already large quantities of a material known as "Panonia," or leather cloth, is manufactured by the use of this extraordinary substance, and made up into boots and shoes, which rival in the durable qualities the best kinds of leather, and it is equally valuable for preserving stone, brick, works in plaster, or any similar substance.

But this sence has never cooled, or in the least abated, my affection for my native land. I have been in a position to estimate, better erhaps, than they who have always lived in this country, the blessings which we, as a nation, enjoy-blessings which God has, if I may say so, lavished upon us-blessings enjoyed by no other nation under the whole heaven.

I have at various times traveled through fifteen or sixteen kingdoms of Europe; have traveled in Asia and Africa, but have found no nation or kingdom which consider equal to our own republic. With all our troubles and sorrows, I consider this as the glory of all lands. Here, with one exception, and that is the cause of all our troubles, all enjoy true civil and religious There is no other place, that I have seen, where the poor can so easily find subsistence-no other place where every man is more easily appreciated according to what he is really worth-and should the Union be restored, I believe there is no nation upon earth whose influence for good throughout the world will be so great as that of our own. Fair.

Dn. Aven: Your Pills are the paragon of all that is great in medicine. They have cured my little daughter of ulcrous sores upon her hands and feet that had proved incurable for years. Her mother has been long giveously affilieted with biatches and pinples on her skin and in her half. After our child was cured, she also tried your Pills, and they have cured by.

ANA MORGRIDGE.

As a Family Medicine. From Dr. E. W. Carboright, New Orleans Tour Pills are the prince of purges. Their excellent salties surpass any cathartic we posses. They are lid, but very certain and effectual in their action on a bowels, which makes them invaluable to us in the ally treatment of disease. Headache, Sick Headache and Foul

Stomach.
From Dr. Edward Boyd, Baltimors. Bras Bun. Arms: I cannot snawer you schall com-plaints I have dured with your Fills better than to say sail that see ever trust with a purgative medicina. I place great dependence on an effectual cathartic in my daily contest with disease, and believing as I do that your Fills afford us the best we have, I of course value

here highly.

Dr. J. C. Aven—Elr: I have been repeatedly cured of the worst heralizehe any body can have by a dose or two af your Pile. It seems to arise from a foul stomach, which they cleanse at once.

Yours with great respect.

ED, W. PREBLE.

Gierk of steams: Clarion. Billious Disorders-Liver Complaints. From Dr. Theodora Bell, of New York Olky. Not only are your Pills admirably adapted to their pose as an aperiant, but I find their beneficial effects on the Liver very market indeed. They have in mustles proved more effectual for the cure of billow applicable than any one remedy I can mention. I sharely repole that we have at length a purgative which worthy the confidence of the profession and the peak

Dysentery, Diarrhoa, Relax, Worms. From Dr. J. G. Green, of Chicage.

Your Pills have had a long trial in my practice, and hold them in eateem as one of the best aperients I have ver found. Their alterative effect upon the liver make hem an excellent remedy, when given in small dose in billous dysendery and diarrham. Their sugar oating makes them very acceptable and convenien in the use of women and children. Dyspepsia, Impurity of the Blood. From the Rev. J. V. Himas, Paster of Advent Church

Constipation, Cotiveness, Suppression, Rheumatism, Gout, Neuralgia, Dropsy, Paralysis, Fits, etc. From Dr. J. P. Vaughn, Montreal, Conada. Too much cannot be said of your Pills for she cure of outremess. If others of our fraternity have found hem as efficacious as I have, they should join me in proclaiming it for the benefit of the multitudes who suf-

mend no other to my patients.

From the Res. Dr. Howbes, of the Methodist Episopai Church.

Howene Sise I should be ungrateful for the reliet your skill has brought me if I did not report my case to you. A cold settled in my limbs and brought on exeruciating neurolosic patent, which ended in chronis rheumatisms. Notwithstanding I had the best physicians, the disease grew worse and worse, until by the advice of your excellent agent in Baltimore, Dr. Mackenzie, I ried your Pills. Their effects was also but sure. By persevering in the use of them, I am now entirely well.
